

*The following questions are used to help a group of graduate students in education better understand the learning process for students who are in grades 8-12.*

*Write whatever comes to mind and it is not necessary to answer all of the questions.*

1. Do you use instructional software or internet web sites in school? If so, which ones?
  
2. Thinking about games or software you have used in the past, what features would you like to have included in an instructional game? Why?
  
3. How do you learn facts and concepts best?
  
4. What kinds of games do you play? (Board-games, interactive etc) What kinds of videos do you watch?
  
5. What are some things that help you learn new material?
  
6. Is there anything that you don't like about learning new material? Does anything make it difficult?
